Perimeter Control Technology

“Expand Your Boundaries Safely, Easily and Affordably”

For Professional Safety, combining real world performance and true portability has never been an option – until now! Work zone perimeter control moves into the twenty-first century with Flex-Safe brand safety barricades.

Easy to Use & Highly Effective

Combining high strength, light weight materials with state of the art design, Flex-Safe brand safety barricades offer a professional solution for perimeter control and pedestrian traffic management.

Flex-Safe Barricades

Flex-Safe brand safety barricades (pat. pend.) are unlike any other barricade on the market today. The unique X-Brace design unfolds instantly to create the most versatile and complete perimeter management system available anywhere.

Seamless Protection

The convenient lockstraps quickly connect each unit to the next, allowing virtually any configuration, on any site.

Compact & Amazingly Portable

Each Flex-Safe barricade has the ability to fold down into an extremely compact unit that is easy to carry and convenient to store.

SPECIFICATIONS

Powder Coated Light Gauge Steel Tubing

Weight – 12 lbs.

38”h x 38”w x 7ft 4” l (Open)

48”h x 6”w x 8”l (Closed)

Federal Highway Administration (FHWA) Approval for National Highway System (NHS) under NCHRP-350 Crash Testing Provisions (USDOT Safety Standard for Work Zone/Roadside Use)

Flex-Safe Product Features & Benefits

Easy Carry Handle

A strong and flexible handle makes these barricades easy to handle, with ample room for gloved hands.

Non Slip Feet

Tough rubber feet keep Flex-Safe from sliding on virtually any surface.

Quick-Close Connect Strap

The convenient lockstraps connect each unit to the next and bundle the unit tightly when not in use.

Nestability

After each use, the system folds down to surprisingly compact units which are easy to store and stack.

Reflective & High Visibility Color

These high visibility units provide the general public with clear and forceful direction. The striping on the mesh banner is highly reflective.
